

SALESFORCE CAREER MENTORSHIP PROGRAMME

# From Use Case to Job Offer

A Practical Path to Salesforce Interview Success

Transforming theory into real-world Salesforce project experience

# THE CHALLENGE

Why do qualified candidates struggle in Salesforce interviews?

## Theory Only

Certifications are valuable, but hiring managers want to see real-world application, not just textbook knowledge.

## No Project Experience

Without hands-on configuration work, candidates can't speak to specific business problems they've solved in Salesforce.

## Can't Tell a Story

Interviewers ask 'Tell me about a project you built.' Most candidates freeze — they've never built anything to show.

# THE 5-STEP JOURNEY

A project-based mentorship that simulates real Salesforce delivery

1

## Use Case Creation

Transform a business problem into a professional use case document

2

## User Stories

Translate requirements into structured, interview-ready user stories

3

## Solution Design

Map business needs to Salesforce features and propose a solution

4

## Build in Salesforce

Configure the solution in a real Salesforce org — hands-on experience

5

## Stakeholder Playback

Present your work confidently using a polished PowerPoint deck

## THE OUTCOME

- ✓ Real project experience to discuss
- ✓ A live Salesforce demo to show
- ✓ A professional deck to present
- ✓ Confidence to impress any interviewer

# STEP 1: USE CASE — REAL EXAMPLE

Salesforce Event Management System | Supporting B2B and B2C Event Operations

## COMPANY PROFILES IN THIS USE CASE

### **GlobalEdge Consulting**

#### Professional Services

200+ events/year, 12 event managers, 3 offices

### **Meridian Financial**

#### Financial Services

Investor events, GDPR compliance, audit trails

### **NovaTech Solutions**

#### SaaS / Technology

500+ partners, 50,000+ customers, tiered model

## KEY BUSINESS PROBLEMS IDENTIFIED

- ▶ Fragmented tools & manual processes
- ▶ No distinction between B2B vs B2C audiences
- ▶ Poor visibility of event ROI
- ▶ Weak pre/post-event communication
- ▶ Payment & invoicing complexity
- ▶ GDPR / data privacy compliance risk

# STEP 2: USER STORIES — B2B vs B2C

Understanding distinct requirements shows business analyst thinking in interviews

## B2B EVENTS

## B2C EVENTS

|                                                           |              |                                                         |
|-----------------------------------------------------------|--------------|---------------------------------------------------------|
| Company nominates delegates; account-level group bookings | Registration | Individual self-registers; simple, fast, public-facing  |
| Corporate invoice with 30–60 day payment terms            | Payment      | Online payment at point of registration (card/digital)  |
| Formal; copied to account manager & company admin         | Comms        | Direct, personalised, consumer-friendly tone            |
| Account manager notified; feeds into engagement scoring   | Post-Event   | High-engagement individuals flagged for sales/marketing |
| Full audit trail — who attended, what was shared          | Compliance   | GDPR consent management; data subject rights            |

# WHO BENEFITS FROM THIS PROGRAMME?

## Salesforce Admin

### Hands-On Configuration

- ✓ Build custom objects & fields
- ✓ Configure flows & automation
- ✓ Manage roles, profiles & sharing rules
- ✓ Demo a live working org

## Business Analyst

### Requirement Gathering

- ✓ Create use cases from scratch
- ✓ Write structured user stories
- ✓ Map business needs to Salesforce
- ✓ Lead a solution playback session

## Data Analyst

### Business-to-System Thinking

- ✓ Understand data model design
- ✓ Build reports and dashboards
- ✓ Link business KPIs to system data
- ✓ Present insights to stakeholders

# NEXT STEPS — MAKING THIS REAL

01

## Stakeholder Validation

Review this use case with key stakeholders — Event Management, Marketing, Sales, Finance, and IT — to confirm gaps and alignment.

02

## Discovery Workshop

Conduct a structured workshop to validate B2B vs B2C distinctions and surface any organisation-specific rules or constraints.

03

## Solution Design Document

Commission a technical spec covering data model, automation design, integration approach, reporting, and user access.

04

## Proof of Concept

Configure core event registration and communication flows in a Salesforce sandbox for early stakeholder validation.

05

## Phased Delivery Roadmap

Deliver incrementally — core registration first, then payment integration, then advanced reporting and marketing automation.

READY TO BRIDGE THE GAP?

# Turn Your Certifications Into Conversations That Win Jobs

Real project work

A live demo to show

Interview confidence

**Next Step: Validate this use case with your team, then commission the Solution Design Document to begin building.**
